U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of
Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki
Published bi-monthly by Pergamon Press

HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

Scientific Translation Editor:
R. C. Glass, M.A., M.Sc.,
The City University, St. John Street, London, E.C.1.

Translators: J. Berry, D. E. Brown and H. F. Cleaves

Publishing and Advertising Office:
Pergamon Press Ltd., Headington Hill Hall, Oxford, OX3 0BW

Annual subscription rate £60 ($150)
Subscriptions are only serviced after payment has been received and are not accepted for less than one year.
Orders should be sent to the distributors at either of the following addresses:
Headington Hill Hall, Oxford, OX3 0BW
Maxwell House, Fairview Park, Elmsford, N.Y. 10523

LIST OF CONTENTS

Number 1

Page

N. K. CHUKHRUKIDZE: Asymptotic expansions of Legendre spherical functions with an imaginary argument 1

Yu. V. RAKITSKII: New methods for calculating the commencement of a table in the numerical integration of ordinary differential equations 14

S. K. GODUNOV and G. P. PROKOPOV: The solution of differential equations by the use of curvilinear difference networks 35

L. Kh. TSOVIKYAN: An analog of multilinear functions for approximation in W_2^2 60

E. P. VASIL'EV: The method of straight lines for the solution of a one-phase problem of the Stefan type 81

Yu. K. DEM'YANOVICH: Convergence rate estimates for some projection methods of solving elliptic equations 102

L. A. OGANESYAN and L. A. RUKHOVETS: Variational-difference schemes for linear second-order elliptic equations in a two-dimensional region with piecewise smooth boundary 129

I. S. KATS: Application of the over relaxation method to the solution of three-dimensional problems for second order equations 153

A. L. TEPTIN: A difference analogue of Mikusinsk's theorem and its applications 167

V. I. PLOTNIKOV: The convergence of finite-dimensional approximations (in the problem of the optimal heating of an inhomogeneous body of arbitrary shape) 182

Short Communications

Z. A. DAUGAVET: Variant of the stepped exponential method of finding some of the first characteristic values of a symmetric matrix 212

G. G. TSEGELIK: The scaling of coefficients in some numerical methods for determining the zeroes of functions 224

Page

V. A. VARYUKHIN and S. A. KAS'YANYUK: The effects of the fluctuations of the terms of a positive sequence on its canonical principal representations 230

N. N. KALITKIN: The computation of the Fermi–Dirac functions 237

N. S. BAKHVALOV and L. G. VASIL'EVA: Evaluation of the integrals of oscillating functions by interpolation at nodes of Gaussian quadratures 241

A. B. BAKUSHINSKII and V. N. STRAKHOV: The solution of some integral equations of the first kind by the method of successive approximation 250

YAN VAL'KA: Discontinuous solutions of a multidimensional quasi-linear equation (numerical experiments) 257

E. G. DAVYDOV: Pontryagin's maximum principle for processes with smoothly varying control domains 265

A. B. RABINOVICH: The optimization of some linear systems with distributed parameters 274

I. A. KRYLOV: Numerical solution of the problem of the optimal stabilization of an artificial satellite 284

B. V. GISIN: The lower bounds of the characteristic values of the simplest non-linear equations of a scalar field 292

E. S. KUROPATENKO and V. H. OGIBIN: A scheme for simulating particle trajectories in systems of complex geometry 298

G. P. PROKOPOV: Numerical realization of a variational principle of V. S. Vlasimirov 307

I. G. DYAD'KIN and S. A. ZHUKOVA: The formulation of Schrödinger's problem and an algorithm for its solution by the Monte-Carlo method 316

V. F. TURCHIN: Selection of an ensemble of smooth functions for the inverse problem 328

A. L. DYSHKO: A difference method of solving the propagation of a light ray in a non-linear medium 340

A. M. TOMASHPOL'SKII: A generalization of a problem on transfers 347

M. P. SHURA-BURA and M. I. KABANOV: An empty word in a grammar type 2 350

Page

Book Reviews 353

Number 2

V. M. VOLOSOV and B. I. MORGUNOV: Methods of calculating stationary resonance vibrational and rotational motions of certain non-linear systems 1

V. A. MOROZOV: The error principle in the solution of operational equations by the regularization method 63

V. Ya. ARSENIN and V. V. IVANOV: The solution of certain convolution type integral equations of the first kind by the regularization method 88

I. V. KONOVAL'TSEV: The stability of two-layer difference schemes 107

NGUEN TAM: Application of the method of straight lines to irregularly shaped regions 124

V. K. DEM'YANOVICH and Yu. K. DEM'YANOVICH: The rate of convergence of projection methods for parabolic equations 139

A. S. IL'INSKII and A. G. SVESHNIKOV: Methods for investigating irregular waveguides 167

S. K. GODUNOV and I. L. KIREEVA: Some self-modelling motions of an ideal gas 181

A. A. DORODNITSYN and N. A. MELLER: Approaches to the solution of stationary Navier–Stokes equations 205

E. A. ZHOGOLEV and V. Sh. KAUFMAN: An improved class of grammars served by a concept separation algorithm 218

P. N. ZAIKIN: The numerical solution of the inverse problem of the operational calculus in the real domain 229

T. I. CHUKUNOVA: Study of the zeros of the transcendental function $g(z) I \nu'(z) + h(z) I \nu(z)$ 235

L. Ya. OBLOMSKAYA: Methods of successive approximation for linear equations in Banach spaces 239

A. B. BAKUSHINSKII: Some properties of regularizing algorithms 254

V. I. KOROBOV: The convergence of a variant of the method of dynamic programming for optimal control problems 260

I. V. FRYAZINOV: Economical symmetrization schemes for solving

vol. 8 1968

Page

boundary value problems for a multi-dimensional equation of parabolic type 271

N. I. ZHIRNOV: Investigation of the asymptotic properties of solutions of the wave equation at singular points of the potential 284

Kh. M. GEIMAN: Analyticity with respect to a parameter of the phase separation boundary in the problem of the crystallization of a melt on immersing a plate in it 291

V. E. TROSHCHIEV, V. F. YUDINTSEV and V. I. FEDYANIN: Acceleration of the convergence of iterations in solving the kinetic equation 298

A. A. SHKURPELOV: The spectrum of the monoenergetic neutron transport operator in spherical geometry 309

A. I. KHISAMUTDINOV: Estimation of functionals of the solution of the conjugate radiative transfer equation by the Monte Carlo method 322

O. S. RYZHOV: Some properties of transonic flows of a real gas 330

E. A. KOLCHAKOVA, V. N. NORIN and A. V. SHVETSOV: The application of conformal mappings to the solution of some problems of the plane theory of elasticity 343

V. A. TUZOV: Regular sets of strings of a graph 360

Scientific Information

A. P. SPEISER: The IFIP, its structure and its aims 369

Letter to the Editor 375

Book Reviews 376

Number 3

Ya. M. ZHILEIKII: Quadrature formulae on classes of functions 1

Yu. I. NEIMARK, V. N. SMIRNOVA and A. M. STERLIN: Investigation of the stability of difference methods 15

A. N. GAIPOVA: A homogeneous implicit difference scheme for the solution of an evolutionary equation with phase variations 40

A. A. ARSEN'EV: Scattering of a plane wave at a singular potential 54

M. G. KUZ'MINA and M. V. MASLENNIKOV: Dependence of the asymptotic properties of the solution of Milne's problem on the scatter indicatrix 97

Page

G. A. MIKHAILOV: Estimation of some nonlinear functionals and approximate calculation of the group constants of transport theory by the Monte Carlo method 121

V. K. ZAKHAROV and O. V. SARMANOV: Asymptotic methods for investigating the level crossings of a Gaussian Markov process 134

V. V. RUSANOV: Three-dimensional supersonic gas flow round a blunt body 156

L. I. SEVERINOV: Calculation of the supersonic part of the disturbed region for supersonic non-equilibrium flow past a blunt body 180

Short Communications

B. N. PSHENICHNYI: A descent algorithm 197

B. P. PUGACHEV: Application of a generalization of Vandermonde's determinant 207

A. F. ZABOLOTSKAYA: A method of accelerating the convergence of the iterative method of determining the leading eigenvalue of a selfadjoint operator 216

V. Ya. ARSENIN and V. V. IVANOV: The effect of regularization of order p 221

Yu. V. VOROB'EV: A random iteration process in the method of alternating directions 226

A. A. KORNEICHUK and N. Yu. SHIRIKOVA: An iteration method of finding the best approximation polynomial 239

E. S. BIRGER: An estimate of the error on replacing the condition of boundedness of the solution of a linear differential equation in an infinite interval 244

L. M. DEGTYAREV and A. P. FAVORSKII: A flow variant of the sweep method 252

N. N. KALITKIN: A sweep for an infinite thermal conductivity 262

S. B. SHIKHOV and L. K. SHISHKOV: The existence and uniqueness of the positive solution of a critical reactor equation 266

V. G. BAGROV and V. A. BORDOVITSYN: The motion of an electron in electromagnetic fields of special form 274

V. F. BAKLANOVSKAYA: Numerical solution of the problem of pressure restoration and relief wave propagation in an elastic-plastic filtration

Vol. 8 1968

Page

process 282

E. P. LAPINA: A paradox of the theory of shallow water 291

M. S. SOVALOV: The collapse of spherical cavities 301

Yu. G. POLYAK: Economical algorithms for simultating random variables 306

Book Reviews 308

Number 4

F. L. CHERNOUS'KO: An optimal algorithm for finding the roots of an approximately computed function 1

A. Ya. DUBOVITSKII and A. A. MILYUTIN: Necessary conditions for a weak extremum in optimal control problems with mixed constraints of of the inequality type 24

R. GABASO: The theory of optimum processes in discrete systems 99

T. S. ZVERKINA: A one-parameter analogue of Adam's formulae 124

I. G. BELUKHINA: Difference schemes of some static problems in the theory of elasticity 140

I. A. ADAMSKAYA, S. K. GODUNOV and G. P. PROKOPOV: The expression of V. S. Vladimirov's functional in terms of spherical harmonics in tensor form (P_3-approximation) 163

V. S. VLADIMIROV: Singularities of the solution of the transport equation 199

P. I. CHUSHKIN: The method of integral relations for supersonic three-dimensional currents 203

Short Communications

N. V. PETRI and Kh. D. IKRAMOV: Extremal properties of some matrix norms 219

V. S. SPIRIDONOV: Application of the gradient relaxation method for the solution of systems of nonlinear equations 231

G. I. BAGMUT: Interpolation for special functions 234

B. L. GRANOVSKII: Random quadratures of the Gaussian type 244

L. D. AKULENKO: Stationary motions in perturbed autonomous systems 253

Page

V. I. TSURKOV: Variations of the solutions of quasilinear systems 264

I. V. KONOVAL'TSEV: Stability in C and L_p of two-layer difference schemes for parabolic equations with variable coefficients 270

A. V. GULIN: Necessary and sufficient stability conditions for three-layer difference schemes 278

A. I. VAINDINER: The convergence of a direct method 285

V. V. KUCHERENKO: The short-wave asymptotic behaviour of Green's function for the N-dimensional wave equation in an inhomogeneous medium 294

NGO ZUI KAN: The motion of a rigid body with cavities filled with an incompressible viscous fluid 303

S. G. SINCHENKO: Approximation of thermodynamic functions of the air 309

V. A. TUZOV: The minimization of graph schemes 317

G. A. MIKHAILOV: A "direct" method of simultating random variables 328

Letters to the Editor 331

Book Reviews 331

Number 5

A. Ya. DUBOVITSKII and V. A. RUBTSOV: Linear time-minimal problems 1

M. F. KASPSHITSKAYA and A. Yu. LUCHKA: The collocation method 19

M. A. ALEKSIDZE: Series in nonorthogonal systems of functions 40

E. E. TAMME: Solution of a nonlinear boundary value problem for a second-order ordinary differential equation by the method of finite differences 69

I. G. DYAD'KIN and V. N. STARIKOV: The use of symmetry and other features of neutron paths for speeding up computations by the Monte Carlo method 87

A. V. LUK'YANOV: Determination of the photon distribution function *in vacuo* for the case of multiple reflections at a boundary 102

A. A. SAMARSKII, P. P. VOLOSEVICH, M. I. VOLCHINSKAYA and S. P. KURDYUMOV: A finite-difference method for the solution of one-dimensional non-stationary problems in magneto-hydrodynamics 117

vol.
8
1968

Page

K. V. BRUSHLINSKII: A method of calculating two-dimensional plasma flows in coaxial channels 135

O. N. KATSKOVA and P. I. CHUSHKIN: Supersonic three-dimensional gas flows with unstable processes 147

E. E. SHNOL': A high-temperature boundary layer in air 165

I. V. VITEN'KO: Optimum algorithms for adding and multiplying on computers with a floating point 183

G. A. MIKHAILOV: A principle for optimizing calculations by the Monte Carlo method 196

Short Communications

V. V. VOEVODIN: Accuracy of the solution of a system of equations by direct methods 208

N. I. KOKOVKIN-SHCHERBAK: Minimization of computational algorithms in the solution of the elimination problem 212

N. V. SLONOVSKII: A class of integral representations and some estimates of Bessel functions 220

G. M. VAINIKKO and A. M. DEMENT'EVA: The rate of convergence of a method of mechanical quadratures in an eigenvalue problem 226

A. V. DZHISHKARIANI: The least squares and Bubnov–Galerkin methods 235

L. T. POZNYAK: Estimation of the rate of convergence of a variant of the method of intermediate problems 246

E. S. BIRGER: Stability of the calculation of some functionals of the eigenfunctions of a Sturm–Liouville problem in an infinite interval 261

L. D. AKULENKO: Some rotating-oscillating systems subject to high-frequency perturbations 272

A. V. POPOV: Solution of a parabolic equation of diffraction theory by a finite difference method 282

V. I. IVANOV: Calculation of corrections to geometrical optics – I. The scalar problem 289

V. M. KOCHETKOV: Solutions of the single speed transfer equation for an instantaneous mono-directional point source 302

Yu. Ya. MIKHAILOV: Stability of some numerical schemes of the three-dimensional method of characteristics 312

Page

L. A. STAROSEL'SKII, G. A. SHELUD'KO and B. Ya. KANTOR: A realization of the ravine method with adaption of the amount of the ravine step by an exponential law 316

Yu. N. KONDYURIN: Some problems of increasing the accuracy of the Monte Carlo method and its use in calculating the probability characteristics of non-linear automatic control systems 326

V. V. RODIONOV: The parametric problem of shortest distances 336

Book Reviews 344

Number 6

V. F. DEM'YANOV: Differentiability of a maximum function – I. 1

G. K. ZAKHAROV and V. I. PLOTNIKOV: Linear time-optimal systems with two groups of control parameters 16

L. S. RAKOVSHCHIK: On the Newton–Kantorovich method 31

V. B. ANDREEV: On the convergence of difference schemes approximating the second and third boundary value problems for elliptic equations 44

A. A. ARSEN'EV: The spectral function of a Schrödinger operator with strongly singular potential. Wave operators 63

S. F. MOROZOV and L. V. PUSKUNOVA: The method of straight lines for solving the non-stationary transport equation 76

L. I. PONOMAREV and T. P. PUZYNINA: The two-centre problem of quantum mechanics – II. Mathematical section 94

I. G. DYAD'KIN: The Feynman–Schrödinger equation and the method of statistical perturbations 112

V. A. BASHKIN: Calculation of the equations of a laminar boundary space layer by the method of integral relations 125

N. D. KOPACHEVSKII and A. D. MYSHKIS: Free vibrations of a self-gravitating liquid sphere with viscous and capillary forces 139

V. A. VASIL'EV: The asymptotic behaviour of waves in passive media 157

Scientific Communications

B. P. PUGACHEV: The use of badly converging iterative process for the solution of sets of linear equations 172

vol.
8
1968

Page

L. S. DASHNITS and M. S. ZUSMANOVICH: The question of the localization of the characteristic numbers of a matrix 177

R. KRAUTSTTENGL: An iterative method for finding a simple root of the equation $f(x) = 0$. 186

V. M. SMIRNOV: A method for the smooth interpolation of functions 190

V. T. GAVRILYUK and E. Ya. REMEZ: The principle of uniform approximation as applied to the treatment of the results of conditional measurements 194

V. M. SOLOSOV: Integration over regions different from a unit cube 198

A. K. PONOMARENKO: Cubature formulae for some space integrals 208

B. N. PSHENICHYI and L. A. SOVOLENKO: Accelerated method of solving the linear time optimal problem 214

A. D. SIDORENKO and B. L. ROZHIDESTVENSKII: A problem with a contact discontinuity 226

A. Ya. PEREL'MAN: Integral characteristics of systems with a narrow distribution 237

P. Ya. UFIMTSEV: Current waves in a thin wire and on a ribbon 250

V. I. LEBEDEV: Problem of the convergence of a method of estimating iteration deviations 262

A. G. ZARUBIN: The problem of non-stationary free convection 265

E. A. KOPINSKII: Algorithm for the solution of a sampling problem 273

V. A. TUZOV: Discrimination of closed subgraphs 276

N. V. CHERNIKOBA: Algorithm for discovering the set of all the solutions of a linear programming problem 282

A. A. BOGACHEVA, V. A. PEREPUKHOV and E. E. RUKHMAN: Application of the Monte-Carlo method to calculate the aerodynamic characteristics of bodies of complex shape in free molecule flow 294

L. N. KOROLEV, V. P. IVANNIKOV and A. N. TOMLIN: Functions of the dispatcher of the operational system BESM-6 305
